

TILOBEMAXX™ Implant Drill Usage Chart

The drills for TILOBEMAXX™ Implants utilize an improved design for increased efficiency, longevity and overall ease-of-use. To maintain optimal performance Keystone Dental recommends replacing drills after 20 uses (depending upon bone density). The chart below provides an easy method for tracking drill usage. Simply check the box next to the corresponding drill each time it is used. Then, order a replacement drill as you near 20 uses.
